TOTAL EXPERIENCE

4 years

Personify Health (Health Care Product Based)

July 2025 - Present

Software Engineer II

Noida

- Develop and maintain backend microservices using **Spring Boot, Java 21, Kotlin, and PostgreSQL** for health and wellness programs, handling member data management and real-time updates.
- Work with **Kafka** to build event-driven features that process messages asynchronously, handle failures gracefully, and ensure reliable data flow across multiple services.
- Build and maintain **RESTful APIs** that integrate with various services, ensuring smooth data synchronization and communication between different parts of the application.
- Collaborate with frontend teams to develop **Angular-based microfrontend applications**, ensuring seamless integration between backend services and user interfaces.
- Write unit and integration tests using **JUnit5** to ensure code quality, catch bugs early, and maintain system reliability across Transform and Data Ingestion services.
- Written database queries, triggers and maintain **PostgreSQL** schemas to support data storage, retrieval, and optimize query performance for health program operations.

Carecloud (Health Care Product Based)

Jan 2024 - Dec 2024

Software Developer

Remote

- Developed healthcare web application for managing patient health records using **Spring Boot, Microservices, MySQL, MongoDB, Kafka and Angular**, improving patient data accessibility by **40%**.
- Designed **RESTful APIs** for patient record management and appointment scheduling, reducing booking time by **30%**.
- Implemented secure authentication with **Spring Security**, ensuring **100% compliance** with healthcare data protection regulations.

Adecco

Sept 2023 - Dec 2023

Java Developer

Bangalore

- Developed car marketplace web application using **Java, Spring Boot, Microservices, MySQL, Postgres, Kafka and ReactJs**, increasing user engagement by **35%**.
- Implemented microservices for user management, car listings, and transaction handling, improving system scalability by **40%**.
- Performed unit and integration testing, reducing production bugs by **30%**.

Dizitalpods Technologies

Feb 2022 - June 2023

Java Developer

Bangalore

- Developed flight reservation application with **Microservices, Spring Boot, MongoDB and Kafka**, improving system performance by **30%** and booking efficiency by **25%**.
- Built **RESTful APIs** and optimized SQL queries, reducing data retrieval time by **20%**.

TECHNICAL SKILLS

Languages/Frameworks: Java, javascript, HTML/CSS, Python, Spring Boot, Hibernate, JUnit, Reactjs, Angular

Databases and Tools: MySQL, Postgres, MongoDB Apache, Kafka, Git, Eclipse, Postman

Other skills: Data Structures and Algorithms, SOLID, Design patterns, Microservices

Certification: Machine learning

Build Tools: Maven

Coding Profile: 5 star on Hackerrank 🔗

EDUCATION

Supreme Knowledge Foundation Group of Institutions

Aug 2016 – July 2020

Bachelor of Technology in Computer Science & Engineering (CGPA: 7.22)

West Bengal
